## SUMMARY

AI/ML-focused CSE undergraduate with hands-on experience in full-stack web development, database systems, and real-time machine learning applications. Passionate about drone technologies, automation, and building secure, user-centric digital solutions.

## EDUCATION

Shri Ramdeobaba College of Engineering and Management (B-Tech) | CSE(AIML) (2026) Nagpur, India

- CGPA : 7.55
- Related Coursework: Data Structures & Algorithms, Computer Networks, Operating Systems, Database Management System, Machine Learning, Artificial Intelligence, Object-Oriented Programming

Shankarrao Bande Art and Science College Warud | 12th : 80.67 % (2022) Warud , India

NTR High-School Warud | 10th : 97.20% (2020) Warud , India

## SKILLS

- Programming Languages: Python, SQL, JavaScript, C, C++, HTML, CSS
- Libraries/Framework: React.js, NodeJs, Flask, NumPy, Pandas, TensorFlow, PyTorch, Scikit-learn
- Databases: MySQL , MongoDB , Prisma
- Tools/Platforms: Jupyter Notebook , Git, GitHub ,VS Code ,Tableau

## EXPERIENCE AND PROJECTS

**UTMS | Co-Founder and Software Lead | BERAM Pvt. Ltd.** June 2025 – Present

- **Unmanned Multi-Drone Traffic Management System**: Built a full-stack platform for autonomous fleet coordination, mission planning, and real-time vehicle monitoring.
- **3-Tier Technology Stack**: Developed a distributed architecture using **React** (Frontend), **Node.js** (Backend Proxy), and **Python/Flask** (Flight Control Engine).
- **Real-time Telemetry & Control**: Integrated **WebSockets** for live data streaming and **MAVLink/DroneKit** for low-level vehicle communication and commanding.
- **Autonomous Mission Logic**: Implemented automated flight sequences (Takeoff, Waypoint Navigation, RTL) with a robust state-machine for mission execution.
- **Geospatial Visualization**: Developed an interactive ground control dashboard using **Mapbox GL** and **Leaflet** for real-time GPS tracking and geofencing.

**LIMITUP.AI | Gamified Self Improvement App (Link)** Feb 2026

- **AI-Powered Architecture**: Engineered a gamified productivity platform that transforms goals into missions using a dynamic XP system and 20-level progression logic.
- **LLM Integration**: Leveraged Google Gemini AI to build a context-aware feedback engine with adaptive coaching personalities (Supportive, Strict, and Savage).
- **Full-Stack & Real-Time**: Developed a scalable backend using Node.js, Express, and Prisma with Real-time WebSockets for hands-free voice-based quest verification and call reminder feature via Twilio.
- **Premium Frontend**: Designed a mobile-first, glassmorphic UI using React 18 and Framer Motion, featuring complex micro-animations and social-ready progress sharing

## POSITION OF RESPONSIBILITY

- **Software Lead** – Leading the team of software developers in BERAM PVT LTD. 2025-Present
- **Sports Secretary** – AIML Department | Currently Guiding all Sports Teams of AIML Dept 2025-2026
- **Creative Lead –** AIML Department | Led a team of **15+ artists** 2024-2025
- **Captain** – RCOEM Volleyball Team|Secured **3rd position in RTMNU** volleyball Tournament 2025-2026
